These Photoluminescent material emits a clear and visible glow when there is power failure. It requires no battery-power or any other triggering source for emission of the glow. Upon exposure to light, natural or artificial, this photoluminescent material absorbs and store energy and then in the absence of light, this captivated light will released to give off a luminous glow over an extended period of time, generally several hours

Available In:  
Type : Plastic Backing Sheet / Self Adhesive Label  
Size : 150 x 450 / 150 x 300 / 150 x 150 (mm)  
Also available for custom print image and cut size
